PUBLIC NOTICE FEMA-1999-DR-TX The Federal Emergency Management Agency (FEMA) hereby gives notice to the public of its intent to reimburse eligible applicants for eligible costs for emergency work and to repair and/or replace facilities damaged by the extreme wildfire threat from April 6 to May 3, 2011. This notice applies to the Public Assistance (PA), Individual Assistance (IA), and Hazard Mitigation Grant (HMG) programs implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5206. Under a major disaster declaration (FEMA-1999-DR-TX), signed by the President on July 1, 2011, the following 45 counties have been declared as eligible for PA under Category B (emergency protective measures) for reimbursement of eligible costs (as determined by FEMA) resulting from wildfires that posed a significant threat to life and property. Andrews, Archer, Armstrong, Bailey, Baylor, Brewster, Callahan, Carson, Castro, Clay, Coleman, Concho, Cottle, Crockett, Dawson, Deaf, Eastland, Garza, Glasscock, Hall, Hemphill, Hockley, Irion, Kent, King, Lynn, Martin, Mason, Mitchell, Moore, Motley, Pecos, Presidio, Scurry, Stephens, Sterling, Sutton, Terrell, Terry, Throckmorton, Tom Green, Trinity, Tyler, Val Verde, and Young with a 75/25 cost share. All 45 counties have been designated as eligible for HMG. On August 15, Fisher, Kent and Moore counties and on August 18, Cochran, Hartley, Jeff Davis and Palo Pinto counties were added to the disaster declaration for all categories of work in the Public Assistance program. All declared counties have been designated as eligible for HMG. Additional counties and categories of work may be designated for assistance at a later date. This public notice concerns activities that may affect historic properties, activities that are located in or affect wetland areas or the 100-year floodplain, and critical actions within the 500-year floodplain. Such activities may adversely affect the historic property, floodplain or wetland, or may result in increasing vulnerability to flood damage. Presidential Executive Orders 11988 and 11990 require that all federal actions in or affecting the floodplain or wetlands be reviewed for opportunities to relocate, and evaluated for social, economic, historical, environmental, legal and safety considerations. Where there is no opportunity to relocate, FEMA is required to undertake a detailed review to determine what measures can be taken to minimize future damages. The public is invited to participate in the process of identifying alternatives and analyzing their impacts. FEMA has determined that for certain types of facilities there are normally no alternatives to restoration in the floodplain/wetland. These are facilities that meet all of the following criteria: 1) FEMA's estimate of the cost of repairs is less than 50% of the cost to replace or reconstruct the facility, and is less than \$100,000; 2) the facility is not located in a floodway; 3) the facility has not sustained major structural damage in a previous presidentially declared flooding disaster or emergency; and 4) the facility is not a critical (e.g., the facility is not a hospital, generating plant, emergency operations center, or a facility that contains dangerous materials). FEMA intends to provide assistance for the restoration of these facilities to their pre-disaster condition, except that certain measures to mitigate the effects of future flooding or other hazards may be included in the work. For example, a bridge or culvert restoration may include a larger waterway opening to decrease the risk of future washouts. For routine activities, this will be the only public notice provided. Other activities and those involving facilities that do not meet the four criteria are required to undergo more detailed review, including study of alternate locations. Subsequent public notices regarding such projects will be published if necessary, as more specific information becomes available. In many cases, an applicant may have started facility restoration before federal involvement. Even if the facility must undergo detailed review and analysis of alternate locations, FEMA will fund eligible restoration at the original location if the facility is functionally dependent on its floodplain location (e.g., bridges and flood control facilities), or the project facilitates an open space use, or the facility is an integral part of a larger network that is impractical or uneconomical to relocate, such as a road. In such cases, FEMA must also examine the possible effects of not restoring the facility, minimize floodplain/wetland impacts, and determine both that an overriding public need for the facility clearly exists and the Executive Order requirements to avoid the floodplain/wetland, and that the site is the only practicable alternative. The State of Texas and local officials will confirm to FEMA that proposed actions comply with all applicable State and local floodplain management and wetland protection requirements. FEMA also intends to provide HMG funding to the State of Texas to mitigate future disaster damages. These projects may include construction of new facilities, modification or existing, undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published if necessary, as more specific information becomes available. Executive Order requirements to avoid the floodplain/wetland, and that the site is the only practicable alternative. The State of Texas and local officials will confirm to FEMA that proposed actions comply with all applicable State and local floodplain management and wetland protection requirements. The State of Texas and local officials will confirm to FEMA that proposed actions comply with all applicable State and local floodplain management and wetland protection requirements. FEMA also intends to provide HMG funding to the State of Texas to mitigate future disaster damages. These projects may include construction of new facilities, modification or existing, undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published if necessary, as more specific information becomes available. Executive Order requirements to avoid the floodplain/wetland, and that the site is the only practicable alternative.
