We are going to look for sand dollars...

...and shells when we go to the seashore.

Kids: color stuff in!

# Newspaper Fun!

www.readingclubfun.com

Annimills LLC © 2020 V16-27

Do you know what **invertebrates** are? They are animals that have no backbone. They may live in water, air or on the land. There are nearly two million kinds of invertebrates.

**Read the clues to fill in the crossword:**

1. I can have up to 40 arms! I pry open shells and eat the scallops, clams and oysters inside.
2. I look a bit like a large coin. Do you see a "flower" when you look at me? Those are rows of breathing holes.
3. I move sideways and burrow in sand or hide between rocks. My pincers protect me!
4. I am headless, but I know the secret of making a grain of sand into a pearl. I have a two-part, hinged shell.
5. We chew tunnels in sand and eat tiny pieces of animals and plants!
6. When I am shy, I pull my head and foot into my shell.
7. I have an exoskeleton (hard shell outside body) and am a scavenger, eating the remains of animals.
8. I can change color to protect myself. I am "well armed" and I wrap myself around my prey.
9. I have 8 arms, and 2 tentacles that are longer and retractable, which I use to catch prey!
10. We stick to rocks. Divers harvest, people use for bathing, cleaning.
11. I am round with long, pointed spines that protect me from enemies and help me move along the sea floor.
12. We look like umbrellas floating gently in the water - but we might sting you!

**FREE Digital Comic Book**

Visit **readingclubfun.com** for a FREE "Let's Camp" puzzle set and a FREE copy (for the first 100 readers) of the "Chip n' Fish" comic book by award-winning artist Matt Ryan

## Ocean Invertebrates!

**Deadly!** Many creatures of the oceans grab, bite or sting. Some have poisons.

Can you unscramble the letters to name the invertebrates?

This invertebrate lives in the deepest part of the ocean. It may have no backbone, but it puts up a giant battle!

It has the largest eyes of any animal in the world.

It is the largest of all invertebrates.

Wow! He's 55 feet long!

Eek! This can't be good!

snail crab

sea urchin sand dollar sea star
