Arctic Action!

Can you imagine living in a land of cold,
snow and ice all year long?
The coldest areas of the world are the Polar
regions, North and South. Greenland, Siberia,
Alaska and Canada are close to the North Pole.
Antarctica is the land mass that surrounds the
South Pole.

People started exploring these
lands of cold, snow and ice
many years ago. In the area of the
North Pole, people came to find
new trade routes to the Far East.
Some explorers wanted to be the
first to reach the poles. Many kept
written records of their observations.

Today, scientists study weather
patterns, glacial movement and animal
life in the Polar regions. These
lands give clues to the
Ice Ages, during which a
large part of the
Earth's surface was
covered with ice!

Read the clues to the right
