PUBLIC NOTICE

FINAL PUBLIC HEARING
TEXAS COMMUNITY DEVELOPMENT PROGRAM
The City of Clarendon will hold a final public
hearing on Tuesday, January 16th, 2024 at
5:05 PM. The hearing will be held at City
Hall at 313 Sully St, Clarendon, TX 79226, in
regard to the Downtown Revitalization Project
that was recently completed with a Texas Community
Development Block Grant (TxCDBG). Topics to
be discussed will include the specific program
improvements completed and the costs associated
with the TxCDBG and the City of Clarendon. Citizens
with a disability requiring accommodation to participate
in this public hearing should contact Brian Barboza,
City Manager, at (806) 874-3438.
DARSE CUENTA
AUDIENCIA PÚBLICA FINAL PROGRAMA DE
DESARROLLO COMUNITARIO DE TEXAS
La Municipalidad de Clarendon realizará una
audiencia pública final el martes 16 de enero
de 2024 a las 17:05 horas. La audiencia se
llevará a cabo en el Ayuntamiento en 313
Sully St, Clarendon, TX 79226 con respecto al
Proyecto Revitalización del Centro que se completó
recientemente con una Subvención en Bloque para
el Desarrollo Comunitario de Texas (TxCDBG). Los
temas que se discutirán incluirán las mejoras
específicas del programa completadas y los costos
asociados con el TxCDBG y la Ciudad de Clarendon.
Los ciudadanos con una discapacidad que requieran
adaptaciones para participar en esta audiencia
pública deben comunicarse con Brian Barboza,
administrador de la ciudad, al (806) 874-3438.

Studying Earth's Climate

For many years, scientists have been charting the world's
changing temperatures. It is natural for some movement of
temperatures to occur, but many people wonder how the
changes in climate that result will affect animals and people in
their habitats and daily lives.

In the coldest northern parts of the world, scientists are
studying ice and the way it freezes and melts. Some are
also studying the region's polar bears, marine animals that
spend most of their time at sea rather than on land. Scientists
have seen that the ice that these bears live and hunt upon is starting to melt earlier in the
season than it once did. The bears are swimming farther from home to hunt for food (seals)
and some are not making it back. Some reports say that polar bears are getting thinner and
that more of their cubs are dying. By studying such changes, scientists hope to understand
how people can respond to protect themselves and wildlife around the globe.

Read the clues to fill in this puzzle about polar bears:

1. A polar bear's _____ layer can grow up to 4 inches thick.
It provides warmth and can keep them from going hungry.
2. Polar bears live in the _____ region around the North Pole.
3. Mothers care for their _____ for about 2 1/2 years.
4. The "food" or prey for polar bears mostly lives in the _____.
5. The foot of a polar bear is partially _____ to help it swim.
6. Polar bears have been known to kill Beluga _____.
7. The loss of _____ may push polar bears closer to extinction.

People check the
temperature of the
sand at the green
sea turtles' nesting
area. They want to
see if any changes
affect the eggs.

8. The bottoms of a polar bear's _____ have
hair to keep them warm.
9. In the wild, polar bears _____ 25-30 years.
10. The skin of a polar bear is actually black, but its _____
makes it look white.
11. Polar bears do not _____ in the winter like other bears.
12. Polar bears can swim up to 60 _____!
13. Polar bears don't like fruit or vegetables; they mostly eat _____.
14. Polar bears have small _____ so they don't lose too much heat.
15. Polar bears are, on average, the _____ bears in the world.
