By the way, those guys down there are the plaque pests, STICKY and DULL. They will be all over your teeth if you do not brush!

Treat Your Teeth Well!

Do you know how to take good care of your teeth? Regular visits to your dentist and daily care will help your teeth last a lifetime! Sometimes you might get tired of brushing or want to "take a vacation" from flossing. But, keeping your teeth clean, healthy and shining brightly is an everyday responsibility.

Remember to:

- · brush before breakfast and before bed
- floss daily
- · go to your dentist for regular cleanings
- try not to eat too many
- sugary or sticky foods

Read the clues to fill in the crossword:

- 1. to take pictures of the inside of your teeth to see if they are healthy
- 2. material dentist uses to replace decayed part of tooth
- 3. dentist with special training to straighten crooked teeth
- 4. when a tooth is eaten away by chemical action
- 5. thin thread used daily for cleaning between your teeth
- 6. person trained to clean teeth is a dental
- 7. four top and four bottom front teeth used for biting 8. number of first or "baby" teeth
- 9. thin, sticky layer of bacteria that forms on teeth
- 10. chemical in teeth and bones
- 11. hole in tooth from decay 12. hard substance left on teeth if plaque is not removed

You use this product when you brush your teeth. It usually has fluoride in it. Fluoride strengthens tooth enamel. It helps stop bacteria in plaque from causing cavities.

Remember to brush

Remember

to floss

too!

your teeth at least

twice a day to keep

those plaque pests

away!
